

To us, communicating with you is really important!

AGT ENGINEERING & OPERATIONS SERVICES represents a pioneering Group of Companies that continuously improves and upgrades its services, to better meet your needs and requirements.

This newsletter aims to inform you on all our current projects and the latest developments on matters of interest. We are always standing by you, ready to apply specialized ideas and solutions. Solutions that are tailored to you, your business environment and your specific needs.

Time after time, the **AGT ENGINEERING & OPERATIONS SERVICES** Group keeps turning up as the top choice among those who seek expert services and total customer solutions.

Here are some of our latest projects.

[Visit our site](#)

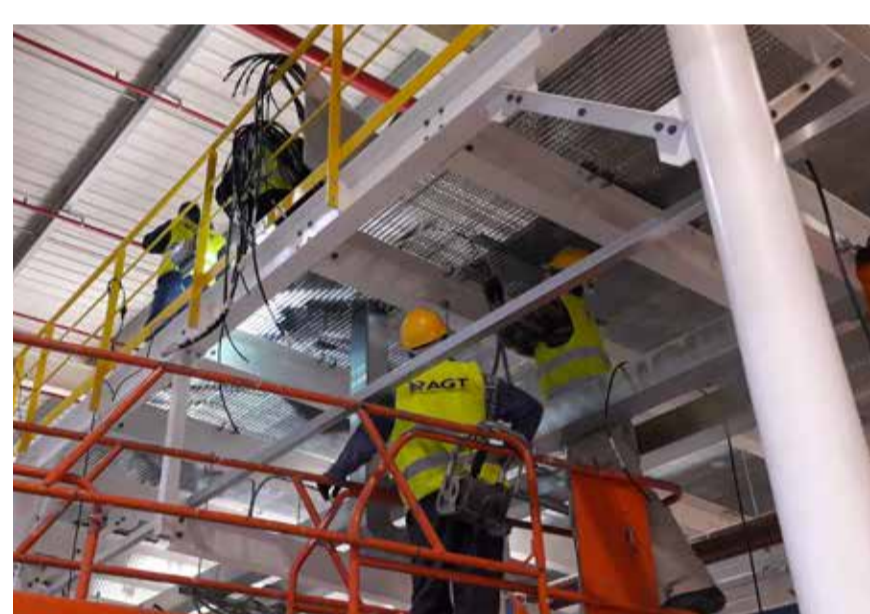

CONSTRUCTION OF OPAP PLAY GAMING HALLS

To be awarded the contract for the main bulk of the project, **AGT ENGINEERING & OPERATIONS SERVICES** had to complete a pilot project. We met with great success the demanding requirements for speed of operations, flexibility, quality of services, safety procedures and overall experience.

As a result, after the completion and evaluation of the pilot GAMING HALLS, we are now the Main Contractor to OPAP throughout Greece.

PRODUCTION LINE EXPANSION FOR A MAJOR MULTINATIONAL INDUSTRIAL COMPANY IN FRANCE

Once again, the **AGT ENGINEERING & OPERATIONS SERVICES** Group is awarded a contract abroad.

Our customers recognize and reward our Group's unparalleled quality of services. Here's an example: our projects in both Greece and Turkey for a major multinational industry have now expanded to France. This new project has unique requirements that demand specialized know-how, and concern the expansion of the production line at the company's industrial facilities in France.

NEW BUSINESS IN CYPRUS

It is with great joy that we announce two new collaborations in Cyprus.

The first collaboration is with **VASSILIKO CEMENT** one of the largest heavy industries in Cyprus. It concerns various engineering projects and technical support, depending on each project's specific needs.

The second is with the **COFFEE ISLAND** company. It involves the Retail FM Umbrella, an innovative, state-of-the-art product developed by **AGT ENGINEERING & OPERATIONS SERVICES**. This product is tailored to the needs of **COFFEE ISLAND**'s network of stores, with more than 330 locations in both Greece and Cyprus, and provides unique services and solutions to the needs of a company that keeps growing.

A SYNERGY WITH SIMON TECHNOLOGIES

Successful synergies are built on mutual respect and trust.

At **AGT ENGINEERING & OPERATIONS SERVICES**, we are happy to announce that our synergy with **SIMON TECHNOLOGIES** is getting upgraded and expanded.

Both companies invest in their common path by amplifying the exchange of know-how and composition of services in their respectful fields of specialization. In this way, they can provide comprehensive solutions for the installation and support of Security and Communications Systems.

Our two companies already cooperate fully and effectively in specialized projects for major clients, among them **ATHENS INTERNATIONAL AIRPORT**, **THE GREEK PARLIAMENT**, etc.

SIMON TECHNOLOGIES represents a Gold Partner of **BOSCH SECURITY SYSTEMS** and **VANDERBILT** (former **SIEMENS SECURITY PRODUCTS**). In addition, in 2015 and 2016, **SIMON TECHNOLOGIES** was the principal partner of **BOSCH** in SE Europe, in Security and Communications Systems.
