- Infrastructure projects

We ensure high-quality construction, with an emphasis on sustainability, efficiency, and adherence to regulations, making them modern and effective for users and their owners.

Fields of Expertise

Fit-out Projects

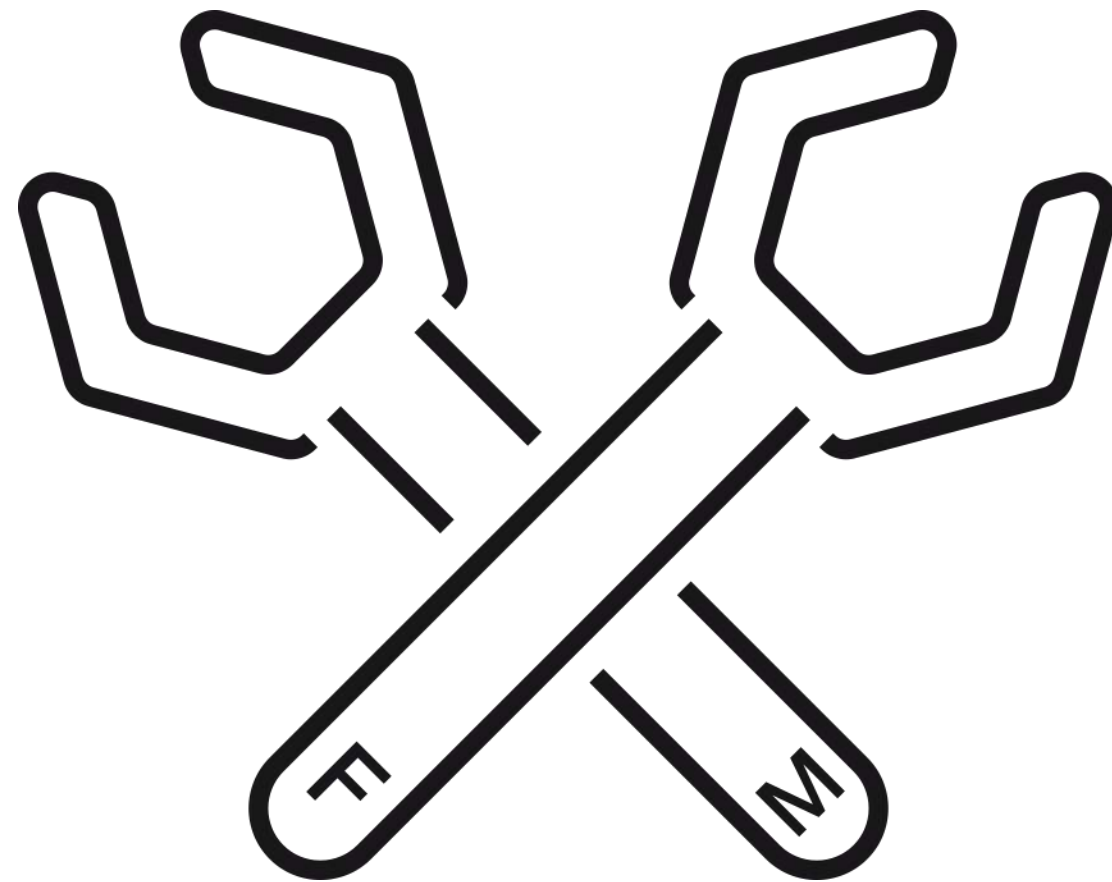

- Office spaces
- Retail spaces
- Hotel
- Medical/Healthcare

Specializing in fit-out projects across various sectors, including delivering innovative and functional solutions tailored to each industry's unique needs.

Fields of Expertise

Facilities Services

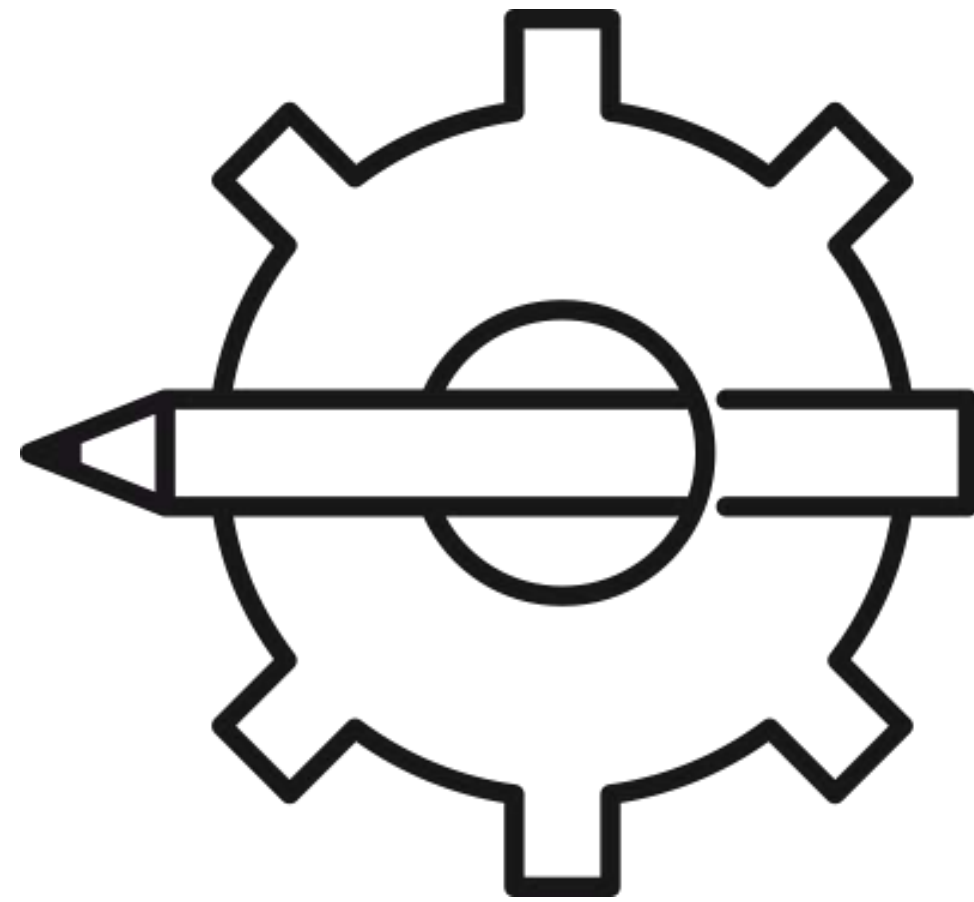

- Hard & Soft services
- Facilities upgrades
- Energy efficiency upgrades

A comprehensive range of services ensuring its partner's property is well-maintained, efficient, and environmentally friendly, helping them achieve long-term value and sustainability.

Fields of Expertise

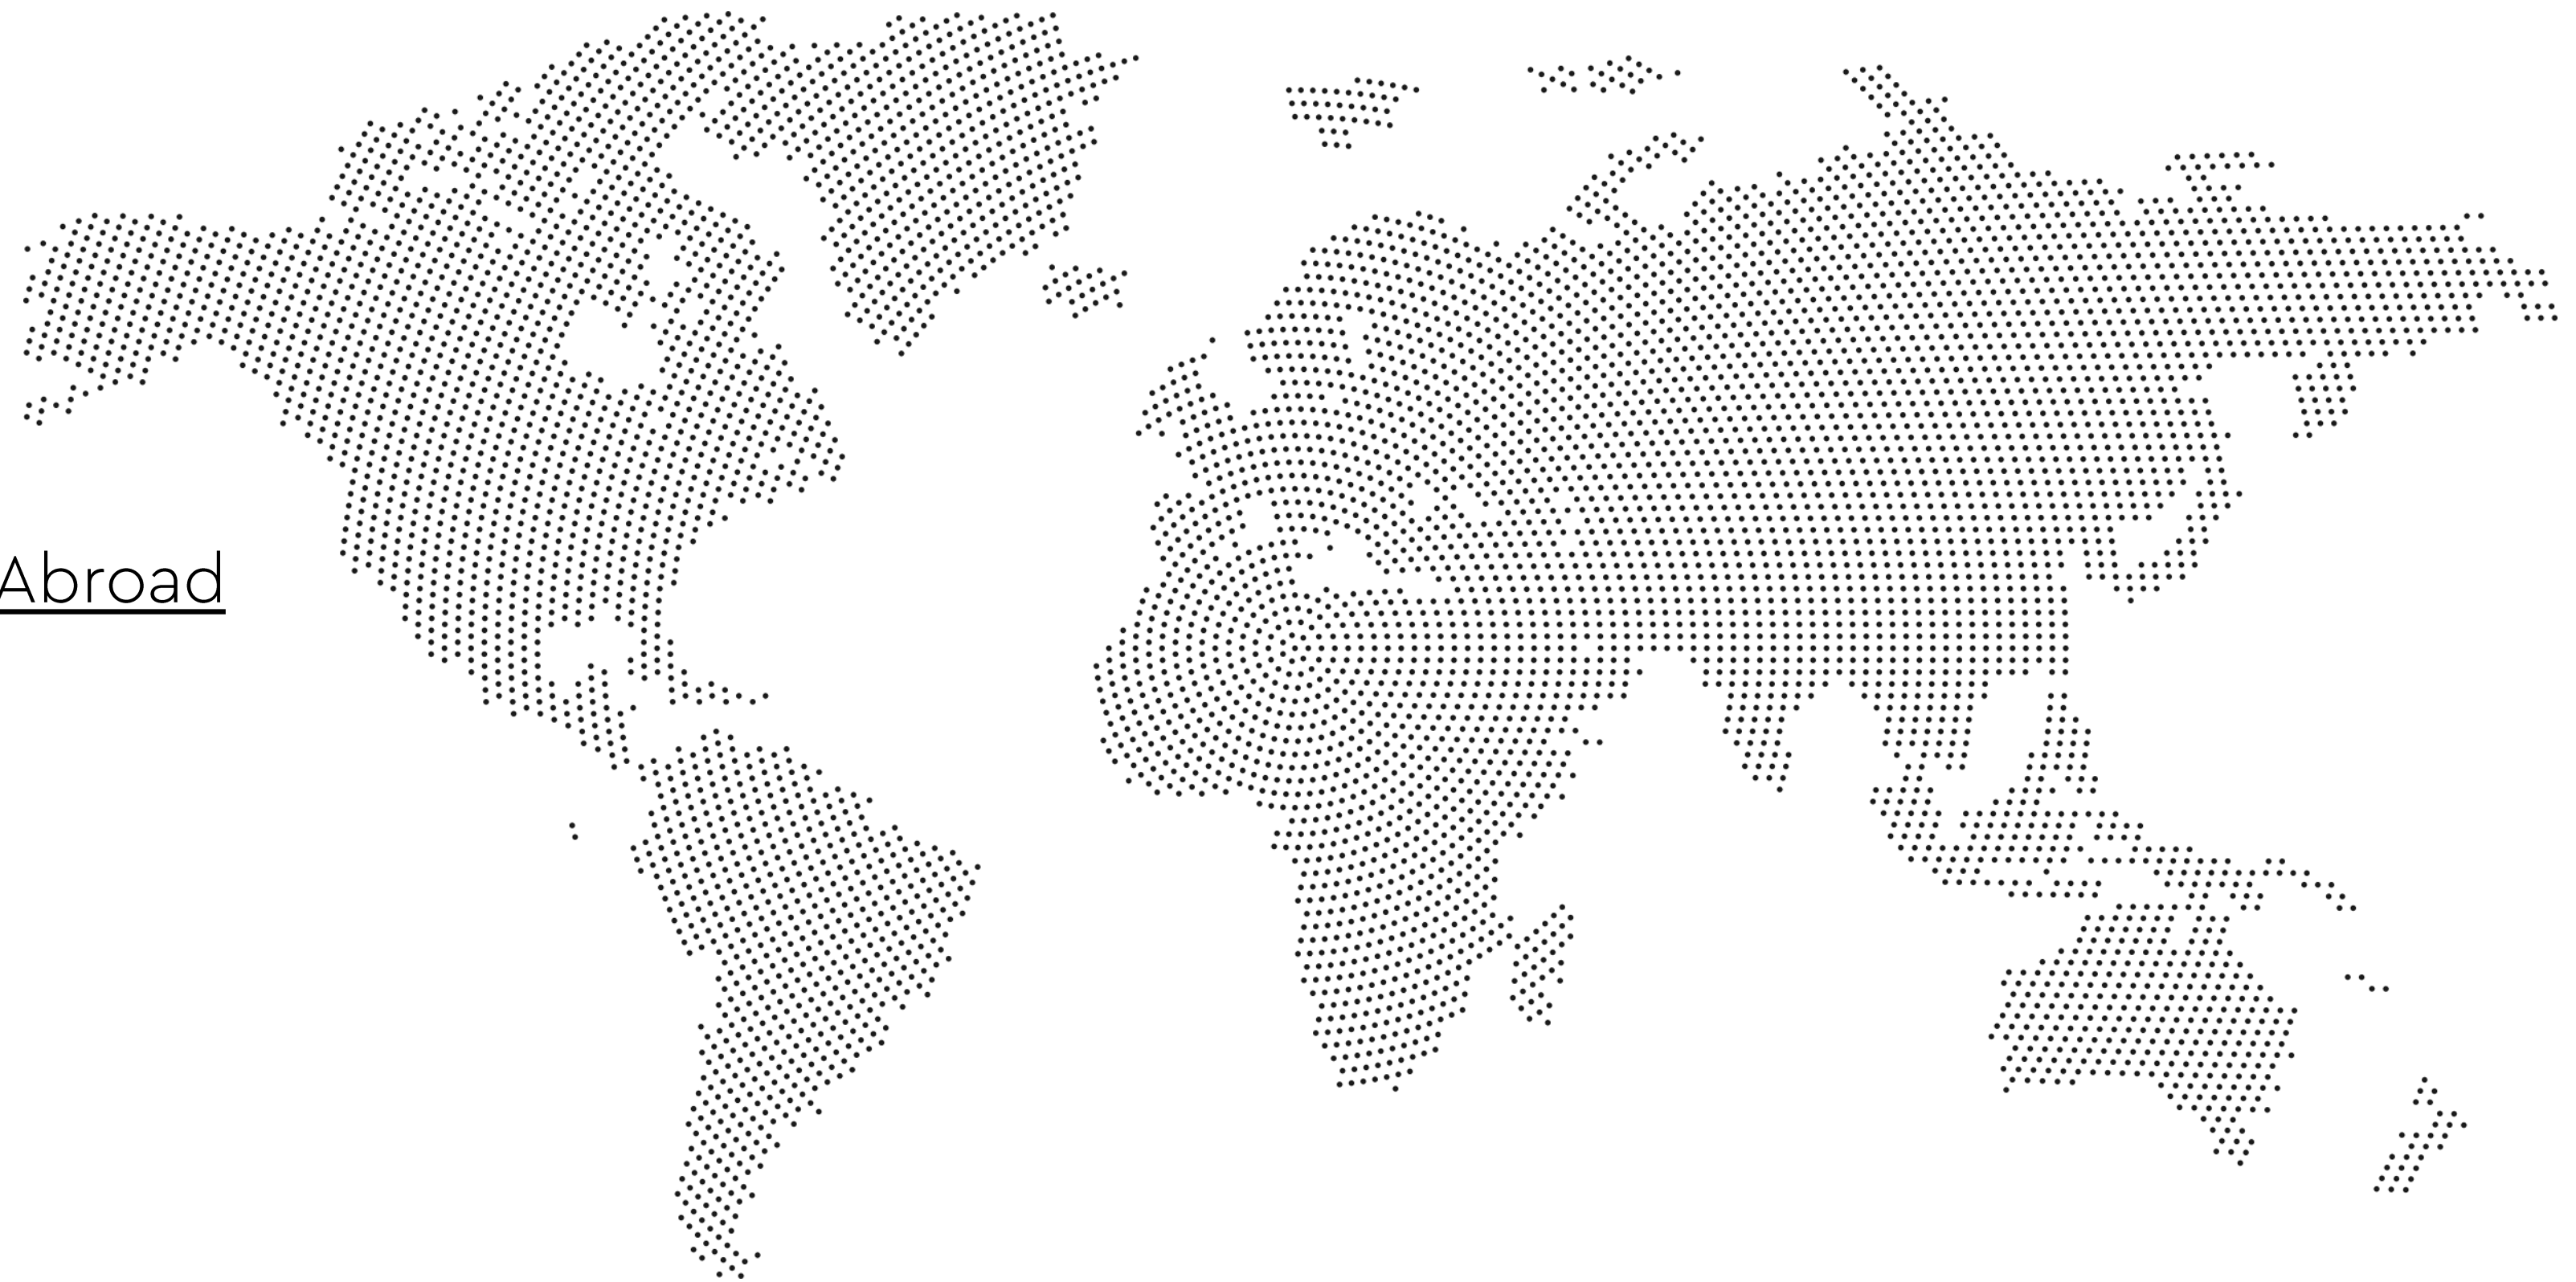

Industrial Engineering

- Production lines assembly
- M/E installations
- Turnkey Relocations

AGT specializes in industrial engineering services, offering: all designed to enhance operational efficiency, ensure safety, minimize downtime, and facilitate secure transitions, ultimately driving our partner's business success with precision and expertise.

Airports

Success Cases

Athens International Airport, highly distinguished among the field globally, with high security procedures and strict standards trusts AGT for more than 12 years, as main contractor for the upgrade of the infrastructure through contracts and construction projects.

Following flexible operational model including civil works and engineering services delivering projects successfully under demanding conditions & time schedule. Finally, AGT had awarded many times for its safety procedures and quality.

Fit-out

Success Cases

ELPEDISON, a powerhouse in the energy sector, born from the collaboration of HELLENiQ ENERGY and Italian energy company Edison, leads in electricity production, supply, and gas distribution.

Pioneering Excellence in Construction

From the meticulous LEED-standard fit-out of ELPEDISON's 4,500 sq.m. headquarters to the development of a dynamic store network across Greece and the refurbishment of existing buildings, AGT's expertise consistently elevates the standards of construction.

Commercial Spaces

Success Cases

Dufry a Swiss-based travel retailer which operates duty-free, duty-paid shops and convenience stores in airports and seaports globally.

AGT was successfully undertaken the construction of commercial spaces at Queen Alia International Airport in Jordan. Our company was selected for its ability to operate in an airport setting, its expertise in interior design and its 25 years familiarity with demanding commercial projects.

Facilities Services

Success Cases

HelleniQ Energy, a distinguished and prominent figure in the energy sector of Southeastern Europe, has placed its trust in AGT for over five years now, for the enhancement and maintenance of HELPE's Headquarters. This long-standing partnership underscores AGT's excellence in hard services facility management.

The contract including the preventive maintenance and technical support to Headquarters of HELPE as well as Civil minor Projects and Engineering projects on demand.

Industrial Projects

Success Cases

Sunlight, a global leader in battery production, has chosen us as their trusted partner and general contractor for over three years. Recognized for our highly expertized engineering services and unwavering commitment to strict safety standards, we are at the forefront of a transformative turn-key project.

Empowering the Future

AGT lead the construction of a cutting-edge Lithium R&D Production Plant, a revolutionary Logistics Center, and several expansive production building facilities encompassing over 31,500 m². Our proven track record, innovative solutions, and client-centric approach ensure the seamless realization of Sunlight's vision.

Industrial Engineering

Success Cases

Crown Holdings, the American global leader of packaging industry perceives us as an entrusted partner for more than 10 years based on our highly expertized engineering services and strict safety standards.

All of the above proven by our involvement in multiple MEP projects such as the turn-key projects of a new production line assembly & installation along with E/M infrastructure works in Italy. Further than that, the expansion of existing production lines in Spain, France, Turkey, Tunisia and Greece.

Infrastructure

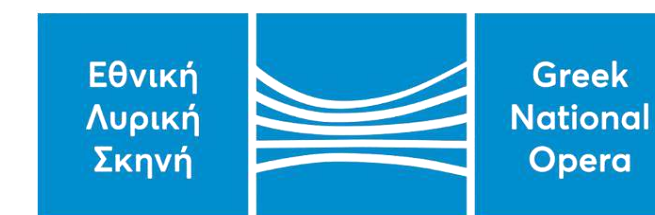

Success Cases

BUILDING INFRASTRUCTURE is the sole construction entity of the Greek state for all public building infrastructures. The company's activities are overseen by the Ministry of Infrastructure and Transport.

In our collaborative efforts spanning over a decade, our company has been instrumental in the inception of numerous turn-key projects from scratch, totaling over 15,000 m². Our contributions have played a pivotal role in the evolution of public infrastructure, with a particular emphasis on advancing the education sector and shaping the future for generations to come. The accomplished projects as well as the ongoing development of 4 new school complexes are distributed across Greece, covering a broad geographic expanse.
